WORKPLACE SAFETY*

It's imperative businesses implement safety-based courses ranging from personal safety to hazardous waste to prevent workplace risks, track injuries and illnesses as they occur to maintain reporting compliance, and prepare for potential changes on the horizon with the help of law and risk alerts.

After all, it takes more than a lunch room poster and steel toed boots to establish a safety culture with engaged employees. It requires Workplace Safety.

Courses ranging from personal safety to hazardous waste enables education across diverse workforces and industries.

Access to Live Advisors provide clarity and action items to help prepare, respond, and reduce risks associated with workplace safety.

Record workplace injuries and illnesses using OSHA Logs and export incidents onto Form 300 or 300A for easy submissions.

“ Top 2 OSHA citations following worksite inspection were for lack of fall protection systems and insufficient information transmitted to employers and employees regarding toxic and hazardous substances. ”

OSHA training courses strictly adhere to the requirements imposed by the governing entity so there is no misunderstanding regarding safety protocols.

Employees with busy schedules can start and stop courses at any time and unlimited access makes it convenient to take a refresher course.

“ OSHA penalties range from \$13,260 (other-than-serious & serious) to \$132,589 (repeat & willful). ”

Employees complete quizzes as an additional layer of prevention.

Certificates of completion and employee tracking provide the legal documentation employers need in the event an issue should arise.

Prevention resources such as *Hazard Risk Assessment* provide employers peace of mind with guidance through worst case scenarios.
